

AICC

Introduction to FLEXO CORRUGATED

Tues. November 9– Wed. November 10th, 2010

Fleetwood Fibre Packaging and Graphics, City of Industry, CA

The AICC is offering packaging professionals a two-day training course built to boost your understanding of flexo corrugated practices and operations. The course will provide attendees with a thorough understanding of Liner, Medium and Corrugated Board. It will help attendees to better understand the machine components, inking system, anilox roll, blade material and dryers. Chris Heusch, will walk you through the process as it relates to artwork, printing plates, materials, manufacturing and mounting. He will also cover printing inks and material and its relationship to color theory and control. In addition, this course will cover machine set-up to include nip-control, servo drive, registration, print length and die cut to print.

Who Should Attend: Key and Lead Operators, Production Supervisors and Managers, Interested Customer Service Leaders, Graphic Sales Personnel in , particularly Graphic Coordinators. **Presented by: Chris Heusch, Arch Inc. Chris Heusch has consulted and trained in the Box Plant Manufacturing Industry over 20 years** in the paperboard packaging and associated industry. He has experience in the European packaging printing industry, and vast experience in machinery manufacturing. For 12 years he has been a leading consultant to independents on three continents. He is in the business of increasing box profitability. His company works to increase the profit of your corrugated box plant through: Process knowledge, Efficiency focus, and quality commitment. With manufacturing vision and marketing revolution we reduce cost of quality through knowledge imparted, and enhance margins through efficiency gained

Also included in the course:

- **An Introduction to the Machine**
- Mounting Plates and Die
- Inking and Feed, Stacker Set
- Strike in all colors
- Register Process
- Run

An added Bonus: *The two-day course will be held within a packaging/printing facility so attendees will be able to tour a plant as well as ask questions of key production personnel.*
