FS POLYJOINER 400

FS POLYJOINER 400

- The FS POLYJOINER can be installed in front of most folder-gluer thanks to its unique 2.10 m (83") transfer module.
- Fast and user-friendly for the operator thanks to the Matic system via C.U.B.E.³ utilizing a 15" colour touch screen.
- Boxes are produced, with great accuracy, standard formats as well as highly sophisticated designs such as:
 - Supermarket shelf-ready boxes
 - Wine boxes with partitions etc...

Benefits

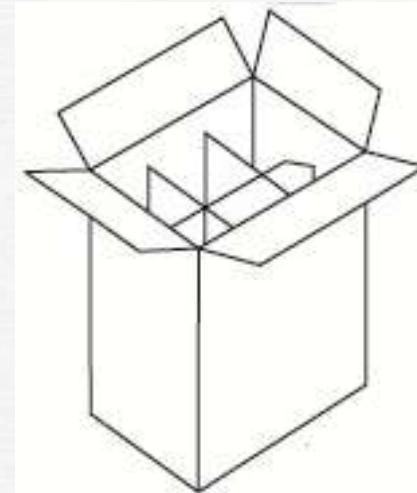

- Its flexibility allows for the production of added value products such as:

Reinforced detergent boxes

Boxes with one or two partitions

Wine box

Shelf-ready boxes

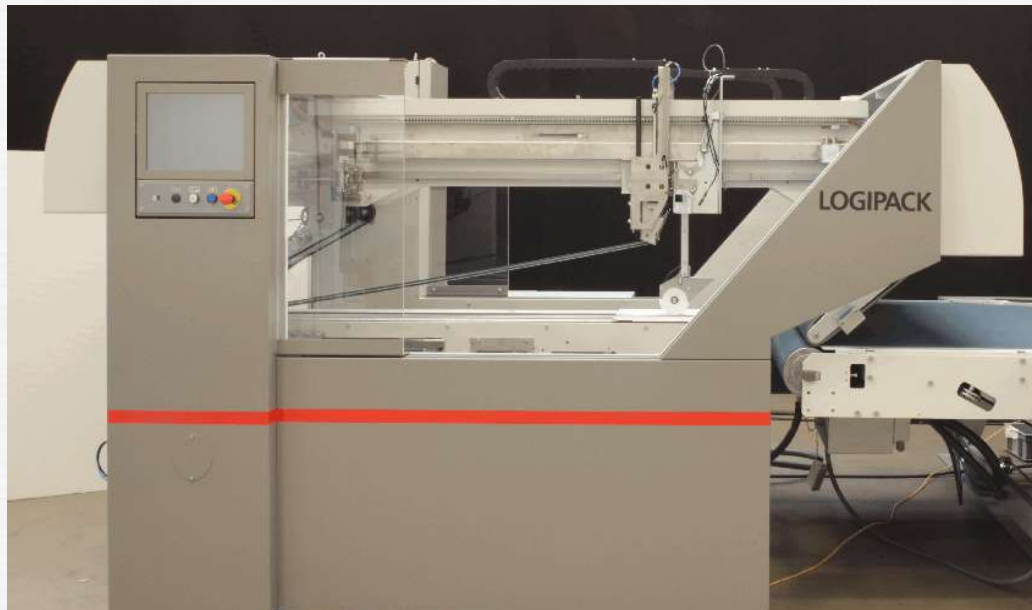

- A product of the latest technological developments, this unit will produce boxes with great accuracy, of unusual formats as well as highly sophisticated designs.

The fully automatic packer for the corrugated board industry

Counting and separating module

- Placed at the end of the folder gluer delivery section, this module counts a batch of a pre selected number and then separates the batch from the main shingle utilizing two pneumatic arms.

Robot and gripping arm

- Placed after the counting and separating module, the robot is designed to move at speed.

Strapping module

- Placed either in line, or at 90° and or 180° depending on plant layout, this unit receives the batch from the robotic arm.
