

Understanding the Elements of Containerboard Manufacturing

This DVD was filmed on location at Kapstone Pulp and Paper's 100% virgin kraft linerboard mill in Roanoke Rapids, NC. Also included in the video is the production of linerboard made from 100% recovered fibre, courtesy of Rock-Tenn's Solvay Paper in Solvay, NY, a 100% recycled linerboard and medium facility.

This DVD is a valuable resource for all those in your plant—as well as your customers—to help them understand the containerboard manufacturing process in today's demanding market.

The 30 minute DVD will show you the entire process, including:

- ◆ Genetic tree engineering and tree nurseries
- ◆ Wood land operations and logging and sustainability forestry
- ◆ Mill wood yard with unloading, slashing, debarking, chipping and chipscreening
- ◆ Digesters, pulpwashers, reject refining and pulp movement to the papermill
- ◆ In the recycled linerboard insert one will experience OCC bale delivery, the hydropulper, the ragger, and the pulp cleaning areas
- ◆ Chemical recovery, water treatment, air emissions, by products, and bioenergy production
- ◆ The paper machine from refining to the head boxes to the fourdrinier, to the press section, through the dryers to the winder to the slitter/rewinder
- ◆ Low rater to the basement to finishing and shipping
- ◆ Environmental stewardship
